

TEST YOUR NEST

Testing indoor air quality in you baby's room

A European partnership between:

- **NGO partners of the Nesting project**
 - WECF France www.projetnesting.fr
 - WECF the Netherlands www.eenveilignest.nl/
 - WECF Germany www.nestbau.info.guide/
 - Clean Up Greece www.cleanupgreece.org.gr/
 - Helen Lynn UK expert Health and Environment

WECF is a network of 100 feminine and environmental organizations, working to achieve an healthy environnement for all.

- **A laboratory, Quad-Lab** http://www.quad-lab.fr/index_en.htm

Founded in 1993 is a dedicated independent testing laboratory with over 15 years of experience in material testing and characterization. QUAD-LAB offers BtoB customers a wide range of Gas Analysis, Organic Chemicals and environmental laboratory services

- **A Consumer Institute, 60 Millions de Consommateurs** www.60millions-mag.com/

60 Millions de Consommateurs is a national association which investigates, through regular testings a wide range of products and services' quality and safety, and provides relevant information to consumers. They contribute to testing chemicals in everyday consumer products

Achievement of the project:

- **Opportunity for young parents to test indoor air quality in their childrne's room:** formaldehyde, volatile organic compounds in the air?
- **Sample of indoor air pollutants in children's rooms in 4 European countries:** France, Germany, the Netherlands, Greece (+ some in Belgium and the UK)
- **Concrete data contributing to Parma conference and beyond**
