## **Grassroots Asbestos Campaign in Asia**

Sanjiv Pandita
Asian Ban Asbestos Network
Geneva, 2015

# Asbestos- A global Concern

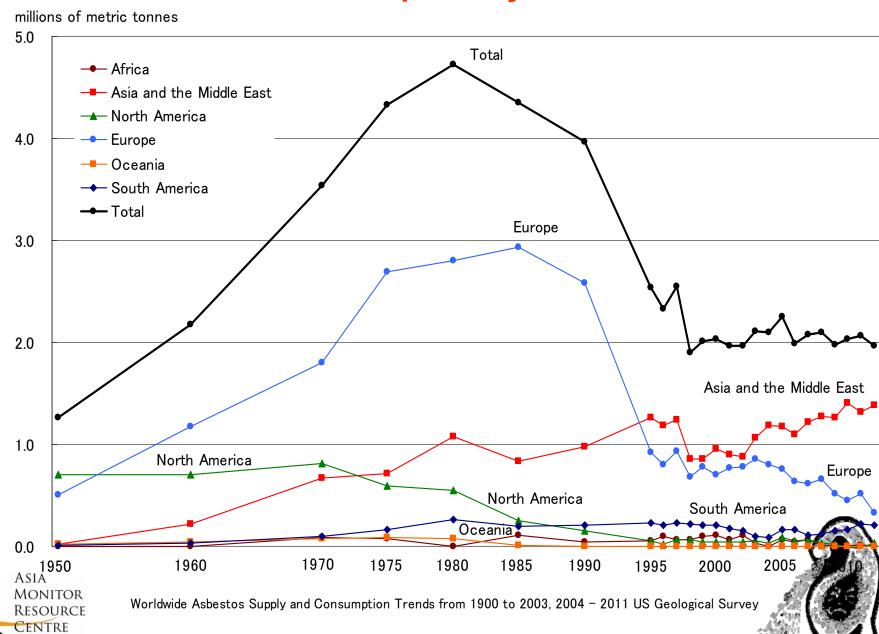

- Workers and communities in west continue to suffer due to past exposure.
- In developing countries especially in Asia, workers and communities continue to get exposed.
- Reduced use in the west led to developing Asia as a major "market" for Asbestos

### **Trend of Asbestos Consumption by Continent 1950-2012**

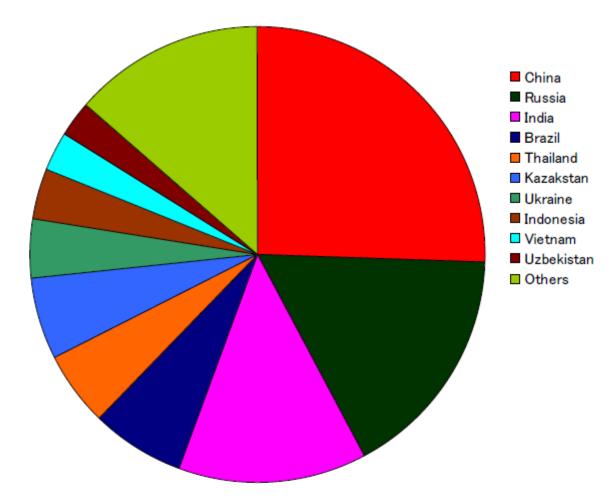

## **Top 10 Asbestos Consuming Countries in 2012**

	Country	Asbestos Consumption (tonnes)	
1	China	530,834	27.1%
2	India	493,086	25.1%
3	Brazil	167,602	8.5%
4	Indonesia	161,824	8.2%
5	Russia	155,476	7.9%
6	Uzbekistan	103,608	5.3%
7	Vietnam	78,909	4.0%
8	Thailand	58,008	3.0%
9	Sri Lanka	54,704	2.8%
10	Ukraine	42,000	2.1%
	World Total	1,961,728	100.0%

## **Top 10 Asbestos Consuming Countries, 2000-2013**

Worldwide Asbestos Supply and Consumption Trends from 1900 to 2003, 2004 - 2013, US Geological Survey

## **Top 10 Asbestos Consuming Countries in 2013**

	Country	Asbestos Consumption (tonnes)	
1	China	570,006	27.1%
2	Russia	432,365	20.5%
3	India	302,668	14.4%
4	Brazil	181,136	8.6%
5	Indonesia	156,050	7.4%
6	Uzbekistan	81,380	3.9%
7	Kazakhstan	66,801	3.2%
8	Vietnam	57,787	2.7%
9	Thailand	53,123	2.5%
10	Turkmenistan	52,983	2.5%
	World Total	2,104,484	100.0%

## Asbestos Use in Asia

- Asia consumes more than half of the global asbestos
- Russia and Kazakhstan major importers

## "Silent Time Bomb"

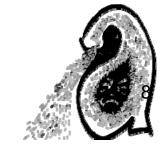

#### **Asbestos**

- is a proven carcinogen.
- is called "Killer Dust" and "Silent Time Bomb".
- can cause serious/deadly diseases, such as mesothelioma (間皮瘤), lung cancer (肺癌) and asbestosis (石棉肺) which have long latency periods.
- is killing 100,000 of people every year all over the world (WHO. ILO).

IARC: Sufficient evidence is now available to show that asbestos also causes cancer of larynx and of ovary.

"Limited" evidence for cancer of colorectom, pharynx and stomach.
- These assessments will be published as part C of Volume 100 of IARC Monographs.

# Why Use Asbestos at all?

- Chrysotile is not safer than other forms of asbestos
- All types of asbestos cause lung cancer, mesothelioma, cancer of the larynx and ovary, and asbestosis (fibrosis of the lungs)- WHO, ILO

#### International Programme on Chemical Safety

#### **Asbestos**

All types of asbestos cause lung cancer, mesothelioma, cancer of the larynx and ovary, and asbestosis (fibrosis of the lungs). Exposure to asbestos occurs through inhalation of fibres in air in the working environment, ambient air in the vicinity of point sources such as factories handling asbestos, or indoor air in housing and buildings containing friable (crumbly) asbestos materials.

Currently about 125 million people in the world are exposed to asbestos at the workplace. In 2004, asbestos-related lung cancer, mesothelioma and asbestosis from occupational exposures resulted in 107,000 deaths and 1,523,000 Disability Adjusted Life Years (DALYs). In addition, several thousands of deaths can be attributed to other asbestos-related diseases, as well as to nonoccupational exposures to asbestos.

Elimination of asbestos-related diseases should take place through the following public health actions:

- recognizing that the most efficient way to eliminate asbestos-related diseases is to stop the use of all types of asbestos;
- h ranlacing achaetoe with eafar cubetitutes and devaloning aconomic and

## Unprecedented death and destruction

Currently about 125 million
people in the world are exposed to
asbestos at the workplace.

 In 2004, asbestos-related lung cancer, mesothelioma and asbestosis from occupational exposures resulted in 107,000 deaths and 1,523,000 Disability Adjusted Life Years (DALYs).

 In addition, several thousands of deaths can be attributed to other asbestos-related diseases, as wel as to non occupational exposures to asbestos- WHO

Ventilation?

# Steps for the Elimination of Asbestos Related Diseases

Step 1: Immediate Ban on Asbestos

Ban on new use/import/sale/etc of asbestos/asbestos-containing materials

Step 2: Asbestos Free Environment/Society

Safe removal/disposal (eradication) of the existing asbestos/asbestos-containing materials

Step 3: Elimination of ARDs

# Asian Ban Asbestos Network: Objectives

- facilitate a total asbestos ban in Asia as soon as possible;
- take steps to reveal the hidden epidemic of asbestos-related diseases in Asian countries;
- reveal the widespread asbestos contamination of Asian infrastructures;
- stop the international transfer of the asbestos industry;
- obtain justice for all asbestos victims, family members and affected communities;
- achieve an asbestos-free society in Asia and globally.
